Enables you to raise your bar to meet global challenges

DNS ERP SOFTWARE

www.dnserp.com

You may need all or some of the above modules depending upon many factors, such as, specific requirements, current business processes, etc. Meanwhile, you may get details on each of these modules and ERP notes on our website www.dnserp.com.

Customization: 80% of most business processes are same in most organizations; however, 20% needs to be customized. That 20% customization gives 80% satisfaction to users, and that is the secret to our successful track-record; of thirty three years. Our strength is in process redesign, ERP implementation, customization, and IT training, MIS and data analysis. All this we do on the spot – by deploying our people where users are – in your plant and / or Head Office. This will ensure speedy and effective implementation.

Highlights of DNS ERP software:

1. Pre-mapped ERP software package for manufacturing business. Multi-company groups. Different year ending (December or March).
2. Suitable for Small & Medium size business units, which has outgrown 'finance-centric' accounting program or legacy software with a turnover of Rs. 3 crore to Rs.300 crore / 20 – 800 employees. Five to Hundred users.
3. User-friendly intuitive features such as:
No cryptic codes to be remembered.
Easy to use GUI interface: To make BOM master – simply drag child item and drop to make BOM.
4. Microsoft platform: Robust RDBMS back-end support for MS SQL Server 2005 database, front end is dot net / VB 6.0. MS Windows 2003 Server Operating System.
5. DNS reports easily integrate with MS Excel. User can instantly prepare Excel sheet automatically. Professional reports generated by Crystal Reports. For instance, Sales figures will be shown graphically i.e. Pie chart.
6. Strong ERP implementation experience.
7. DNS ERP documentation:
 - DNS ERP backed up by 'Proof of Concept' file, which gives sample input / outputs of each module.
 - A comprehensive DNS ERP Reference Manual – documenting business processes.
8. Security module for multi-user environment to allow or deny a given menu or sub-menu to a user. Individual access rights controls – “who will see what information”.
9. Robust subcontractor OUT module – material given out to Third Party. With auto-work order and auto-production features to ensure correct consumption of Raw material at the third party location; linked to BOM.
10. Well-built business logic for the subcontractor IN module – Where material is received FROM customer. Labor bills for processing charges.
11. Project wise monitoring of order linked to pre-sale costing and Material Requirement Planning (MRP) to calculate shortage quantity. Instant information about stock position for any location for ATP (Available to Promise).
12. Multiple inventory locations to keep track of inventory such as 'Material under inspection', Stores, Shop floor, FG Stores, scrap, rejection, multiple factories, etc.
13. Automatic tracking of batch number / lot number / serial number for precise inventory monitoring. Expiry date (if applicable). Tracking item / components by serial number or finding history instantly for a given number.

DNS caters to:

1. OEM supply – Product made as per customer's Specification and Quantity.
2. FMCG – Fast Moving Consumer Goods (make-stock-sale)
3. Both OEM and FMCG
4. Project based manufacturing

14. DNS uniquely integrates Excise, VAT with account books, and inventory books effortlessly. For instance, 57 F4 Challan (214/86) or preparing automatically RG 23 register, or DSA Register, etc.
15. Multi-company structure. Multiple Trial Balance and inventory control for individual entity as well as consolidated Trial Balance. Auto JV feature ensures proper ledger updating. Financial reporting with drill down facility up to the basic transaction. Accounts Payable (AP) and Accounts Receivable (AR) integrated with General Ledger.
16. ISO 9000 documentation / tight integration with Quality control process at various levels.
17. DNS ERP is suitable for FMCG companies as well. Multiple M. R. P. (maximum retail price) matrixes prepared for each SKU for various states in India. Price List matrix linked to the MRP matrix to arrive at the selling price individually for each item. Special discounts for specific festival in a given state in India. Completely integrated with VAT / Sales Tax requirements. Stock Transfer Invoice for goods transferred from factory to own depot / CFA / branch locations. State wise, city wise, item wise sales analysis gives effective MIS for supply chain management.

Seamless integration:

It is recommended that for the ERP to be more effective and yield better results, a detailed BPR exercise be carried out. That's the WIN-WIN approach DNS ERP PVT. LTD. offers – a holistic package. We will take you into the era of 'e-Business'.

We offer ERP Solutions for the full range of your business processes. We have specific industry related ERP solution and expertise. For instance, engineering companies, food industry, packaging industry, chemical industry, automobile ancillary, FMCG, high tech and electronics, surgical instruments, project based manufacturing, sales and distribution, etc. We help implementing a solution that meets your specific requirements. We have a Top-class team of consultants who will ensure your business success.
